CAT® OPTICAL AW20

Caterpillar has a long and rich history in building powerful, reliable engines and tough equipment for the biggest jobs around the world, every day.

Every product that bears the Cat name comes from the same ethos:

STRENGTH, ENGINEERING EXCELLENCE and EFFICIENCY. This season Cat announces a new line up of 11 optical eyewear solutions bringing great value for the XL wearer, helping you to get the job done.

Big men need more room – that's why Cat launch with the XL fit wearer in mind. New titanium model GLAZER delivers a premium-level higher comfort in aviator style, soft rectangular supra. With adjustable nose pads for universal fit and hand refined acetate temples. Fully spring-loaded temples give a secure custom fit.

Cat is known for a quality that you can feel. That's why soft-touch rubberised coating is back for our steel frames. Pressed sheet-steel construction temples, specially adapted for a wider fit as standard. Embossed side trims carry the mark of Cat quality.

New colour details and trims run through the collection – from carbon-effect acetate, to Cat yellow highlights and perforated sports trims.
